

Zanussi Tumble Dry 8Kg ZDC82B4FW

Reduce energy use while tumble drying, making sure nothing is overdried at the same time, with Auto Adjusts intelligent sensors. They're designed to detect how much humidity is in the drum – deciding the perfect length of each cycle for you.

- Energy class: B
- Drying Capacity (kg): 8
- Drum Volume: 118
- Dimensions (mm) (HxWxD): 850x596x615
- Annual energy consumption kWh: 561
- Drying Technology: Condenser
- Cotton programs: Cupboard dry, Extra dry, Iron dry
- Synthetics programs: Cupboard dry, Extra dry

Save Energy and Time, With Auto Adjust

The Auto Adjust function uses clever sensors, inside the drum, to understand how damp your clothes are. It then decides the ideal

length of the cycle, so your clothes always receive the perfect amount of care. Saving you both time and energy.

Creases Reduced with Easy Iron

The Easy Iron program means you don't have to spend as much time ironing after your clothes come out the drum. The reverse tumble action keeps clothes moving freely, preventing them from tangling – reducing creases and drying everything evenly.

Dry your cottons and Synthetics in one load with Mix Easy dry

Dry your cottons and synthetics together in one cycle with the Mix Easy dry programme. Mixed loads will be dried evenly and efficiently without compromising on results, which means less separating and sorting, and more time for you.

Dry on your time with Delay Start

Dry laundry on your schedule with the Delay Start function. Set a time on the machine and the cycle will automatically begin when you want it to – even if you're not home. This convenient setting makes it easier to dry your fabrics when it suits you.

Reversible Door

Don't let the layout of your kitchen, bathroom or laundry room dictate where you place your tumble dryer. By rotating the door's frame, it can be opened in two different positions. So you're free to install it wherever you think is best.
