

# Zanussi Oven ZOHNCOX1

Specification:	
Dimensions (HxWxD)	600x560x550 (mm)
Voltage (V)	220-240
Maximum Power (W)	1875
Temperature	50-250 degrees
Capacity	57 L
Type of oven	Multifunction oven
Energy Efficiency Class	A

- Cooking functions: Conventional/traditional cooking, Turbo, Au Gratin, Interior light, Turbo + Baking without extracting moisture
- Multifunction oven with 4 functions with fixed controls, Stainless steel Anti-fingerprint.
- The fan in the conventional oven allows for faster heating. Air circulates just as you turn it on, rapidly heating the entire oven cavity.
- The hot air generated inside the oven circulates throughout the cavity evenly. This allows for faster heat-up and delivers the same result at 20% lower temperatures, saving you time and energy.
- Enjoy the crispiest bacon, perfectly browned sausages, and gratin cheese with the grill function. Just place them in the upper part of the oven and you will get exceptional results.

- To remove the door, it is only necessary to lift some tabs found on the hinges. The glass of the door is extracted by simply removing the upper trim of the door.
