

**We control the boiling water, you think about the delicious dishes**

The 700 SenseBoil® hob regulates boiling water. It automatically adjusts the temperature settings by sensing when the water is close to boiling, bringing it to a continuous simmer. So you can focus on preparing delicious dishes without having to monitor the boiling water.

**Product Benefits & Features****SenseBoil®, to keep boiling water under control**

SenseBoil® senses when the water in your pot reaches boiling point. The boil-to-simmer function automatically adjusts the temperature to bring boiling water to a controlled simmer. So you can focus on creating other dishes.

**Hob2Hood® for maximum convenience**

The Hob2Hood® function connects the hood and the hob via a wireless connection. Start cooking and the hood will automatically adjust the settings, offering the best extraction based on the power selected on the hob.

**Combine cooking zones with the Bridge function for more cooking space**

The Bridge function allows you to connect two separate cooking zones to create a single, large surface. Thanks to the automatic alignment of temperature settings, it is ideal for making the most of large pans, such as griddles and baking trays.

**Touch controls for each cooking zone**

Easily adjust your hob's temperature settings with our touch controls. Each cooking zone has its own power control, for clear viewing and easy temperature adjustments.

**Infinite cooking zones adjust to the size of the pans**

Infinite cooking zones automatically adjust to the size of the pans placed on them, instantly. The zones provide complete coverage, regardless of the size of the pan, delivering heat without compromising performance.

- Induction glass ceramic - 80 cm
- Hob2Hood® connection
- Electronic control with Slider Touch commands
- 4 cooking zones
- Automatic rapid heating
- Cooking settings lock
- Elapsed cooking time indicator
- Minute minder
- End of cooking programmer
- Child safety function
- Power, additional power function
- Easy Snap in installation system
- Black Aesthetics

Product Specification

Type of hob	Induction
Location of controls	Frontals
Color	Black
Dimensions (mm, Width x Depth)	780x520
Net weight (kg)	11.76
Maximum absorbed power (W)	7200
Possibility of installation above a table top	No
Possibility of installation above a dishwasher	No
Safety features	Timed automatic shutdown
