

**Combine zones with the Bridge function to have more space in the kitchen**

The Bridge induction hob lets you combine two separate cooking zones to create one large surface. With automatic alignment of temperature and time settings, it's the perfect solution for making the most of utensils like griddles and roasting pans.

Bridge 60cm induction hob

**Product Benefits & Features****Combine cooking zones with the Bridge function for more cooking space**

The Bridge function allows you to connect two separate cooking zones to create a single, large surface. Thanks to the automatic alignment of temperature settings, it is ideal for making the most of large pans, such as griddles and baking trays.

**Infinite cooking zones adjust to the size of the pans**

Infinite cooking zones automatically adjust to the size of the pans placed on them, instantly. The zones provide complete coverage, regardless of the size of the pan, delivering heat without compromising performance.

**The hob works perfectly even with limited power supply**

Your induction hob will allow you to cook at your best and prepare delicious dishes even with limited power.

**Hob2Hood® for maximum convenience**

The Hob2Hood® function connects the hood and the hob via a wireless connection. Start cooking and the hood will automatically adjust the settings, offering the best extraction based on the power selected on the hob.

**Direct Access, for immediate control**

Direct Access controls let you instantly adjust your hob's heat settings. Just one touch is all it takes. Effortless hob control.

- Induction glass ceramic - 60 cm
