

Induction: The fastest way to create delicious dishes

Heat up any dish quickly with the induction cooktop. With no gas to turn on or coils to preheat, the cooking zones quickly reach high temperatures, so water boils faster than ever.

With the FlexiBridge® 800 induction hob, cooking is much more practical. Choose from three different configurations for greater flexibility, perfect for when you use multiple pots and pans at the same time. You can choose from: two medium zones, a small and large zone, or an extra large zone.

Product Benefits & Features

Induction: easy, fast and safe

Induction technology means that heat is delivered quickly and precisely to the right spot, while the surrounding areas remain cool and safe. Plus, it reacts immediately to temperature changes. And the smooth surface is super easy to clean.

Hob2Hood® for maximum convenience

The Hob2Hood® function connects the hood and the hob via a wireless connection. Start cooking and the hood will automatically adjust the settings, offering the best extraction based on the power selected on the hob.

The hob works perfectly even with limited power supply

Your induction hob will allow you to cook at your best and prepare delicious dishes even with limited power.

Direct Access, for immediate control

Direct Access controls let you instantly adjust your hob's heat settings. Just one touch is all it takes. Effortless hob control.

Intense and instant heat with Power, the additional power function

Activate the Power function to instantly irradiate the hob with a wave of high-intensity heat. It is ideal for preparing any dish more quickly; you can boil water for pasta faster than with traditional methods.

- Induction glass ceramic - 60 cm
- Hob2Hood® connection
- Electronic control with Slider Touch commands
- 4 cooking zones
- Automatic rapid heating
- Cooking settings lock
- Elapsed cooking time indicator
- Minute minder
- End of cooking programmer
- Child safety function
- Easy Snap in installation system
- Black tempered glass aesthetics

Product Specification

Type of hob	Induction
Location of controls	Frontals
Color	Black
Dimensions (mm, Width x Depth)	590x520
Net weight (kg)	8.78
Maximum absorbed power (W)	4600
Possibility of installation above a table top	No
Possibility of installation above a dishwasher	No
Safety features	Timed automatic shutdown
